

Would your child like to take some pictures for us?

Speech-language pathologists use photos to support the communication of children with a variety of speech and language challenges. The purpose of this research is to explore how children compose pictures and to identify which photo features are most important to young children.

Participant Requirements

- Between 4 to 6 years of age
- Typically developing OR a diagnosis of autism

Compensation: \$40 for completion (Amazon gift card)

Location: Photos will be taken by your child in your own home or the location(s) of you and your child's choosing

Tasks and Requirements:

- Your child will independently take a total of 15-20 *different* photos.
- Photos must be taken in 5+ *different* environments (e.g., different rooms in your house, backyard, park) or during 5+ *different* activities (e.g., playing with cars, playing with action figures, interacting with family and/or friends, eating a snack)
- You must have at least 3 pictures from each environment or activity.
- **15 photos of the same object will not constitute task completion**
- Photos will be captured digitally on the device of your choosing (e.g., your smart phone, iPad).
- You will email the photographs to us, along with other study forms confirming child's eligibility.
- It is expected it will take about 30 minutes to obtain the photographs.
